# Scaffold Archiving

**ARCHIVE** STUDENT DATA

Archive student data & course content **more affordably** than with your legacy LMS.

Scaffold Archiving allows institutions to archive their student data & course content when migrating to a new LMS platform. Content resides on K16 Solutions' platform so administrators can access it any time. Users can push individual, archived course content to the LMS as needed, as well as retrieve student data and print to PDF.

Finally, migrate and retire your legacy LMS platform at the same time.

"The content can easily move from Scaffold Archiving back to Canvas. We don't have to download a cartridge and clean it up later on. Instead, we simply find the course, click a button, and it goes from Scaffold Archiving right over to Canvas. Our archive is now its own version of an LMS where we can easily move content to and from Canvas and Scaffold Archiving."

**Abram (Abe) Hedtke**, Director of Instructional Technology,  
*Saint Mary's University of Minnesota*

CONTENT CAPTURED INCLUDES:

- Enrollment Information
- Student Submissions
- Discussions & Replies
- File Attachments
- Assignments
- Quizzes
- Feedback
- Gradebook

K16 SOLUTIONS

Founded by educators, K16 Solutions is eliminating the LMS challenges institutions across the globe have traditionally faced. Using state-of-the-art technology K16 Solutions can quickly and efficiently migrate courses from one LMS platform to another, help faculty more easily build best-in-class courses, archive student data, and provide other custom LMS services. To learn more, visit [www.k16solutions.com](http://www.k16solutions.com)

# Scaffold Archiving

Archiving student data is **more affordable** than ever.

## **MORE COST EFFECTIVE**

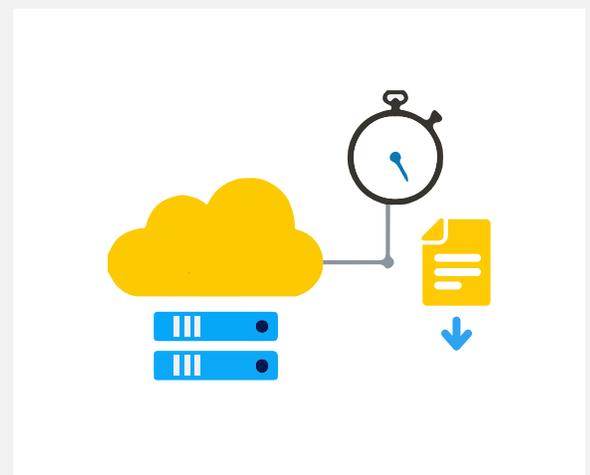

No upfront costs and a flat monthly rate.

- Reinvest cost savings into other critical operations or academic departments
- Realign resources to support learning and teaching rather than platform and server maintenance with the powerful automation of Scaffold technology

## **DELIVER READY-TO-TEACH COURSES**

Easily access historical course content as needed and retain the option for future migrations.

- Hot storage means institutions can access archived course content whenever and wherever they want
- Retain the option of migrating course content in the future Scaffold technology
