Scaffold DataX

Automate your data warehouse and reclaim your team's time

Scaffold DataX automates data warehouses, organizing and centralizing your enterprise data so you can focus on data insights, not data infrastructure.

What is Scaffold DataX?

Scaffold DataX is a powerful SaaS-based solution that automates your data warehouse and seamlessly extracts and aggregates data across your LMS, SIS, CRM, and ERP systems. With Scaffold DataX, institutions can stop spending valuable time and using multiple tools to manage a data warehouse and move directly to analyzing and reporting on their enterprise data.

How does Scaffold DataX work?

Our patented technology uses APIs and front-end technologies to create an automated data warehouse, centralizing all your data in one location, and placing it in a neutral data model to enable seamless analysis and reporting.

Why should I choose Scaffold DataX over other solutions?

- **Resource re-allocation:** Alleviates resource constraints by minimizing the reliance on specialized data engineers and analysts.
- **Data warehouse automation:** Relieves tedious manual processes and the time-consuming burden of collecting data from multiple sources.

- **Reducing cost:** Streamlines the extraction, aggregation, and management of data from multiple sources, reducing the cost burden of multiple roles and technologies.

How can Scaffold DataX impact your institution?

- **Improved student outcomes:** Provides the comprehensive data required to model student success, engagement, and risk metrics, including graduation rates, course progression, persistency, and the impact of non-academic engagement on academic performance.
- **Ease of adoption:** Provides a centralized, trustworthy data source for analytics and reporting featuring robust data lineage capabilities, intuitive navigation, and user-friendly interfaces.

“Scaffold DataX perfectly aligns with our mission to leverage technology to enhance our academic offerings and administrative efficiency. We are confident that the significant improvements in our data handling capabilities will lead to better outcomes across our student, staff, and faculty stakeholder groups.”

- Rick Gallot, President of the University of Louisiana System

Founded by experienced higher education leaders, faculty, and academic entrepreneurs, K16 Solutions solves the biggest EdTech challenges facing institutions today. Using its proprietary technology, schools can automate their data warehouses easily, migrate LMS platforms seamlessly, and archive course content and student data affordably.
