

# Why Choose Scaffold DataX for Your Institution?

Automate your data warehouse and reclaim your team's time

Higher education institutions often struggle with fragmented data, multiple sources of truth, and limited analytical flexibility despite investing in enterprise systems, all while facing the high costs of maintaining a data warehouse. Scaffold DataX bridges these gaps by automating your data warehouse, centralizing your data, and enabling strategic, data-driven decisions.

## What sets Scaffold DataX apart?

Data warehouse automation

Resource re-allocation

Ease of adoption

Scalability and flexibility

**“Scaffold DataX perfectly aligns with our mission to leverage technology to enhance our academic offerings and administrative efficiency. We are confident that the significant improvements in our data handling capabilities will lead to better outcomes across our student, staff, and faculty stakeholder groups.”**

- Rick Gallot, President of the University of Louisiana System

# The impact of Scaffold DataX on your institution

Improved student outcomes

Streamlined operations

Improved data governance framework and security

## Strategic decision-making powered by Scaffold DataX

**Operational Efficiency:** Streamline operations, allowing your team to focus on deriving insights rather than managing infrastructure.

**Student Success Analysis:** Integrate LMS and SIS data to track student performance, driving retention and targeted interventions.

**Financial Planning and Analysis:** Gain comprehensive financial insights, optimizing budget and resource management.

**Compliance and Reporting:** Simplify regulatory compliance with accurate, real-time data for accreditation and reporting needs.

## Technical specifications

**Advanced Data Integration:** Our patented technology ensures seamless integration with LMS, SIS, CRM, and ERP systems, leveraging public and private APIs as well as UI front-end access for comprehensive data aggregation.

**Security and Compliance:** Industry-leading security features, including data masking, and certifications such as ISO 27001 and SOC 2 Type 2, ensure your data is protected and compliant.

**Scalability and Performance:** Built on Snowflake and hosted on AWS, DataX is designed to handle large volumes of data, ensuring your institution can scale effortlessly.

**User-friendly Interface and Experience:** An intuitive platform that simplifies data management, enabling users to create reports and access insights without technical expertise.

## About DataX

Scaffold DataX is a cutting-edge SaaS solution that automates your data warehouse, seamlessly integrating data from LMS, SIS, CRM, and ERP systems. With our patented technology, you can eliminate the complexities of managing multiple tools and focus on making data-driven decisions with confidence.
